Water Well Drillers Report

Effective 2/01/23

Due to water moratoriums that have recently been imposed in parts of Sumner County, a letter from the Water Utility Provider or a Water Well Drillers Report shall be included as part of the building permit application documents. The letter from the Water Utility Provider must state that water services will be provided at address listed on the building permit. If the Water Utility Company is unable to provide services to the address listed on the building permit application then a Water Well Drillers Report must be part of the Building Permit Application.
